—The cotton crop, according to estimates carefully and methodically compiled by the trade at Charleston, where the dealers put on record annually in the first week in May their several computations of the crop of the current year, promises to reach this year from 2,200,000 to 2,300,000 bales, nearly the bulk of the yield of 1867-8.
—George Robbins, the noted English auctioneer, used to indulge in some pretty tall highfalutin in describing property committed to him for sale. For instance, referring to a country place, he said the only drawbacks to it charms were "the litter of its rose-leaves and the noise of the nightingales."
—During the recent session of the Vermont Annual Conference of the Methodist Episcopal Church the Secretary read a letter from an aged minister, who said, among other things, he would rather be a faithful itinerant minister than President of a republic. "So would I, in these times," drily observed Bishop Ames.
—Those who counted upon the negroes in the reconstructed States to vote with the present Republican party in a solid body, are very likely to be grievously disappointed. It is stated, upon apparently good authority, that 15,000 blacks voted the Democratic ticket in Georgia, in the late election, although they voted for the adoption of the Constitution.

GREAT IMPROVEMENT IN DENTISTRY.

The attention of the public is called to a great discovery in Dentistry.

THE GREATEST ADVANCE STEP EVER MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to this the annoyance of food getting under the plate while eating. I have discovered a method of so constructing the plate on which the teeth are set that they will not start or drop while eating or speaking, neither will any particles of food get under the plate, no matter what the condition of the mouth is, which is not true of any method hitherto used.

I have secured Letters Patent for the United States, England and France.

The improvement is not in material, but in the construction, which secures the atmospheric pressure on the entire plate.

I have sold the exclusive of said improvement to Dr. L. Gilman, to wit, the Counties of Franklin, Washington, Chittenden, Lamoille and Grand Isle. Those wishing to avail themselves of such improvement, will call on

Dr. L. GILMAN, ST. ALBANS, VERMONT.
